Noel "Kino" Malonzo

Head of Security R&D, Information Security Architect at Globe
Telecom, Cloud Evangelist, Cybersecurity Strategist
Mandaluyong, National Capital Region, Philippines

Summary

Results-driven and innovative cybersecurity leader with a strong
track record of developing and implementing comprehensive security
strategies to protect sensitive information and ensure business
continuity. Proven ability to collaborate effectively with cross-
functional teams, drive alignment with stakeholders, and adapt
to evolving threat landscapes. Adept at conducting research on
emerging technologies, fostering a proactive security culture, and
ensuring compliance with industry standards. Adept at representing
the organization in international forums and building strategic
partnerships. Seeking a challenging role in cybersecurity leadership
to further contribute to the enhancement of an organization's security
posture and drive its growth.

Dynamic and results-oriented IT professional with a decade
of experience in systems analysis, solution architecture, and
implementation, boasting a strong background in software quality,
functionality, and volume testing. Certified AWS Cloud Practitioner,
Ethical Hacker, Adobe Experience Manager author, and DevOps
expert, with a proven ability to deliver innovative IT solutions. Adept
at leading teams and excelling in high-pressure environments,
consistently recognized by clients and senior management for
outstanding contributions to project success. Awarded Systems
Analyst of the Year (2016) and Solution Designer of the Year
(2019) for exceptional problem-solving and creativity. Committed
to delivering high-quality products on time, with comprehensive
knowledge of the telecommunications industry, organizational
workflows, processes, and end-to-end project management.
